Meet Jens that works here

We create games in Unity from concept to final shippable product. We excel in 3D art and animation and have proven to create commercially viable products in time and budget. After being focused on work for hire for over 7 years we have gathered the experience to conquer the games industry with our own game ideas. We are now looking for the right partners to support our mission to create meaningful unique games for niche markets. We are based in Berlin, Germany which is a great environment for talent and networking. Together with the School4Games we have fostered tight relationship to train and...

Our platform is recommending games to a global audience through a vast distribution network. Our vision is help users to instantly discover and engage with games they want to play, regardless of hardware or software platform.
We reach 15m of unique game plays every month across 6 continents. We help game developers to secure, monetize and distribute their HTML5 games globally at scale through own portals and an extensive partner network.
We love big data: Our dynamic user profiling technology analyzes game consumption patterns and predicts games to people they may like to play as well.

16

Giant Gun Games UG

A game company initially founded for the development of Maze Slaughter

See full page

People, funding & more

Meet Sascha that works here

We are working with a small team on Maze Slaughter, a rogue-like first person shooter for PC, XBox and PS4 in the Unreal Engine 4.

To get the idea what our game is, just think: A rogue-like Serious Sam on roids, in a maze, with piling dead bodies, shouting a Rammstein inspired soundtrack.

You are playing "Dan Jerouz", a butcher from New York who throws a BBQ party in his backyard. Suddenly, he gets abducted by snobby aliens and finds himself in a gladiatorial alien game show where he has to face waves of enemies in various mazes.
If he survives all mazes, he will eventually reach the porta...
